2024 HSI GRANTS DEVELOPMENT INSTITUTE

In November 2024, HSII held its 4th annual HSI Grants Development Institute, hosted at partnering HSI, Pima Community College. This was the first year that participants from HSIs outside AZ were able to attend. The purpose of this full-day institute is to:

- generate awareness of HSI related funding opportunities
- strengthen understanding of HSI models and frameworks
- cultivate networks among those with shared equity-focused interests for pursuing HSI funding opportunities.

“I really enjoyed meeting other people in the HSI space and learning more about the opportunities available. As a junior member at an institution that has a small grants office, it would take me a long time on my own to acquire the information I gained at the workshop.” - 2024 participant
